sasi.kanth80@gmail.com

Full stack web developer with more than 10 years of experience designing, developing, deploying and maintaining wide variety of web applications. I have worked in startups for most of my career, which has given me the opportunity to wear multiple hats and work in fast-paced environments. I have developed side projects and sold one of the projects(www.notion-widgets.com) as well. Absolutely loves coding and solving problems.

Employment History

Principal Developer, ProsperCircle (Freelancer)   *Aug, 2021 - Present*

Working on multiple projects in this position with the technologies like Next.js, React, Tailwind, MongoDB, Postgres & Vector Databases.

Some of the projects I worked on here are https://www.prospercircle.com/, https://www.zenprompts.ai/, https://www.openprosper.com/, https://www.moonpad.io/.

I took care of the most of the development, deployment and maintenance of all these projects along with other junior developer.

Senior Full Stack Developer, Wiculty Learning Solutions   *May, 2019 - Jul, 2021*

An Ed-Tech platform where we provide Instructor Led courses and Self-paced courses to users. Used React for the frontend, Node.js with TypeScript for the API and SQL as a Database.

SchoolWise (Freelancer), Full Stack Developer   *Dec, 2015 - Nov, 2019*

Worked on a lot of different projects as a freelancer for a single client. Had opportunity to learn and use lots of different tools and gaining experience in them. Some of the projects I build at this company are www.schoolwise.com and podcast transcript application using services like IBM Watson and couple of other services.

Junior Web Developer, FexFree   *Jan, 2015 - Dec, 2015*
Worked on a professional network platform which helps recruiters to
find candidates for a job.Used Materialize CSS Framework and Blaze UI Library for the
project.

Junior Web Developer, Redesygn Systems   *Jun, 2013 - Dec, 2015*
HelloSkool is a product built on the IVR technology through which schools can make their
updates available to the parents via a Voice-over on the telephone. Parents can be updated
with info regarding Exam Schedules, Holidays, Notices & much more.. Here I worked as a
Junior Web Developer creating the platform in Node.js using meteor framework with mongodb
as the database, Bootstrap CSS Framework and Blaze UI Library For Frontend.
